

The use of cell phones in the air is not only inappropriate but unsafe. We have no data to suggest that cell phone use doesn't interfere with aircraft navigation systems. By allowing cellphone usage in the air, it would enable terrorists on board to communicate with one another to execute a hijacking more effectively. They could, for example, simply take out a Blackberry to email the positions of flight crew or someone they suspect to be a Federal Air Marshal or to communicate if the flight deck door were being opened for a pilot.

The mixture of thin air, cramped quarters, frayed nerves and alcohol consumption already pushes passengers to the limit. Add multiple, high volume cell phone conversations and the recipe for disaster is complete.

The introduction of cell phone use in the cabin will not only increase tension among passengers, it will compromise flight attendants' ability to maintain order in an emergency.

I am a flight attendant and I oppose the use of cellular phones during flights for these reasons and more.
